Project Noah, Inc. Sawu Pythons

- **Names:** Sweetie and Slimy.
- **Ages:** 5-6 years old.
- **Sexes:** 1 Male and 1 Female.
- **Diet:** Rats and mice.
- **Behavior:** Our sawus spend most of their time in their water bowl or wrapped around the tree limbs in their enclosure. They are extremely docile. They are slim contrary to the image that the word “Python” projects, their average width is about 2-3 inches. The only time you could get bitten is at feeding time.

Interesting facts about Sawu Pythons

- They were discovered in 1993.
- They only live on one island called Sawu, off the coast of Indonesia.
- Their eyes change from silver to white, as they grow older.
- Instead of biting, they wrap around their prey and will not let go.
